

## Proposal: Laravel + React Setup Assistance

Hi,

I see you're facing an issue with setting up your **Laravel + React project** during the **composer install** process. I can help you quickly resolve this by troubleshooting your **PHP version, dependencies, and environment settings** using **AnyDesk or TeamViewer**.

### Why Choose Me?

✓ **Laravel & React Expertise** – Hands-on experience setting up, debugging, and managing **Laravel + React environments** with tools like **MAMP Pro**.

✓ **PHP Version Management** – Experienced in working with **PHP 8.0.x** and ensuring all dependencies are compatible for smooth installation.

✓ **Fast Troubleshooting & Support** – I've resolved numerous setup issues, ensuring that projects run seamlessly without unexpected errors.

✓ **Secure Remote Assistance** – I will assist via **AnyDesk or TeamViewer**, ensuring **no disruptions** to your system.

### Plan to Resolve the Issue:

1. **Check PHP version alignment** in MAMP Pro and the project dependencies.
2. **Diagnose the exact composer error** and resolve missing or conflicting packages.
3. **Update composer.json and environment settings** as necessary.
4. **Run successful composer install** and ensure the entire Laravel + React project is up and running.

I can start **immediately** and have this resolved for you within a few hours. **Would you be available for a quick session today?**

Looking forward to hearing from you!

**Best regards,**  
**Kennedy Otieno**
